GP 85 MIC 20.3 SD 3.0 CV 14.8 CF 99.2 115KG PP

We are keeping two exciting rams this year. GP 6 and GP 85 are both July 2021 drops sired by Glenlea Park 30.

GP 6 is one of the earliest maturing rams we have had. At 10.5 months old he had the impressive meat figures of 115kg, 43.7 EMD and 8.6 CFat. He obviously has an excellent constitution and is a great doer. These traits

should help everyone turn off surplus stock even earlier. He is square and good on his feet, with a very stylish wool.

GP 85 is a very square and pure ram. He is a long stapled free grower with a great outlook. Both rams are very modern and we expect them to have a very positive impact in our flock in the next few years.
